

Do I need a CSCS card for Work Experience or Placements?

You only need a CSCS card if your course includes an extended period of over 30 days of work placement - this includes T-Levels and Traineeships.

You do not need a CSCS card for standard work experience on construction sites.

- Those on basic work experience don't need a CSCS card
- If you're on a course that includes an extended period of over 30 days of work placement such as the T-Level or Traineeship, you'll need to apply for the **Industry Placement card**
- The Industry Placement card costs £36, is valid for three years and cannot be renewed
- Applicants must have successfully passed the relevant Health, Safety and Environment Test within the last two years
